We will be there to deliver and install the trees, and floral displays, to ensure your space is perfect.

SUSTAINABILITY

Flowers can have a huge impact on the appearance of an event, wedding, or corporate environment, but they can also have a huge carbon footprint. We are consciously striving to offset this, and make every effort to ensure our impact is more sustainable.

Without compromising on spectacular flowers, we strive to reduce our negative impact on the environment:

Client visits & Quotations

Client visits to venues are minimized until absolutely necessary. We try to do Zoom calls instead of in-person meetings in order to save on transport costs and save the environment.

Usage of Renewable alternatives

When suggesting what flowers to use we suggest reusable alternatives such as dried or silk flowers or faux trees. We always practice non-oasis floristry when possible.

Use of Seasonal flowers

We always use seasonal flowers and locally grown or British grown ones where possible - which is in itself an environmentally friendly practice.

Waste

We encourage the offering of arrangements to your guests so that flowers are not wasted and everybody has an opportunity to cherish a part of your occasion.

Alternatively we will deliver used arrangements to local charities.

All waste is recycled.

Packaging

Rest assured that all our packaging has been chosen to be without any plastic coating and is biodegradable and recyclable. All foliage that we use is purchased without packaging. All wholesale packaging is returned to our suppliers.

Transportation

Our vehicles are all fully electric now.

Christmas

Even when embracing the magic of Christmas, sustainability is of the utmost importance to us.

From the sourcing our Christmas trees to re-using the dried elements and the baubles whenever possible, we consciously make an effort to limit our environmental impact during the festive season.
